

## **El Cuerpo que no Esta 14195 causas de muerte**

The body that is not here, 14195 causes of death gives an exhaustive list of all causes of death registered by the Ministry of Health of Mexico. Classified by type, gender, family and circumstance. An eloquent part of the bureaucratic codification of life and death. It should only be the most potent book of poetry. Or the macabre detonator of 14 thousand stories. But in the context of a country where people disappear by thousands, for which even having a cause of death is a denied right, this book is a form of denunciation and homage.
