

## Heimo Zobernig // **VIDEO**

VIDEO is an index of all of Heimo Zobernig's (\*1958) video pieces made since 1981. It was designed by the artist using the characteristic typography so typical of his works. Reaching from early videos showing the artist with a long-haired wig bringing up the question of the artist subject, to documentations of performances and reduced graphic works and finally to the technical possibilities of the chroma key technique, the publication also offers a small (subjective) history of the medium of video.
